# OUR SATISFIED CLIENTS

We have an immense base of elite clients who are spread across diverse spectrums of varied industries.

# CLIENT SPEAK

Coordinated and attended a 3 day course on MS Access as part of the training in our company (Volvo). GITS was quite professional in co-ordinating the programme and answered promptly to all our queries. The training taken by Dinesh was quite good too, as it gave us a fair overview of the tool and more importantly it's potential application in the marketplace. The training structure though could be made better and more relevant training material shared with the participants during/at the end of the training. Overall, it definitely was a worthwhile experience.

*Emmanuel Paul (Volvo India, Bangalore)*

The training sessions were informative, helpful and good. The pace was right upto the last session which seemed a little quick. Maybe this should be a three day training to keep the pace consistent.

*Akshay (Genpact)*

Thank you for the reference materials. Regarding the session my feedback : It was a good learning for a beginner like me, however I felt the rush of time as a beginner can take information to certain extent in a day. If this training can be spread to 3 days with more of examples and hands on Qlikview would be helpful.

knowledge wise excellent, flow of the training was good, more of practical practices would be great.

*Neelam (Genpact)*

Best Place to learn R Software Finally found a place to learn R/ R studio at the Jayanagar branch and it was worth it. Very well paced weekend classroom sessions at an affordable price, just what the doctor ordered.

The trainer understood the audience and molded the flow the sessions accordingly.

I strongly recommend Gits Academy specially for the analytic related classroom sessions because the ROI as a learner is higher than many others in this industry.

*Gaurav Sharma ( 247-inc)*

It was great having you on the Advance Excel training , which got appreciated very much.

*Sumit Mittal (Cargill India)*
